## Sustainability along the river

This mythical bar in the Barrio del Oeste is stuck in the 60s. The decoration has hardly changed, and neither have the tapas, good beer or the habit to watch a game with friends. Undoubtedly, El Manzano is one of those lifelong places, one of those that our parents used to go to and that has been able to adapt to new times without losing its essence.

Are you concerned about sustainability and the environment? We are too. That is why the +Tormes project was created. A large space on the banks of the Tormes River with 600 ecological urban gardens kept by locals. This is where we learned again which vegetables belonged to which season. There's a leisure area too, for running, walking or observing the stars. All in all area too, for running, walking or observing the stars. All in all, it's a new model of a more environmentally sustainable city. The whole project is in progress and there will be more coming up. Find out about the initiative at www.mastormessalamanca.

Whether you like to walk, run or cycle, we recom:

The Van Dyck area drives us Salmantinos crazy. It is the paradise of tapas, everywhere you look you find a bar. Rufo's is one of the largest and best situated. It has the whole usual range, but also Rufadas, a kind of bread with different filings. 99 Picnic on the river shore

## In Salamanca we also have a beach. Don't expect miles of white sand with crystal clear waves, but in La Aldehuela you

can at least sunbathe and picnic on the banks of the Tormes river. In addition, the local bars specialise in barbecues. They are ideal for a snack or even dinner. It is also a perfect area for running, outside workout or just feeling the ease of the path that goes along the river and the Isla del Soto. You will have kilometres to run in nature, only about 40 minutes walking from the Plaza Mayor.

it is one of the greenest places in Salamanca.
